About the theme of 6th ICEC

The professionalism in the field of Civil engineering will need to be geared towards developing different kinds of technologically innovative products, processes, and systems for improving the future performance of public facilities in developing countries and to address all the Civil Engineering Issues being faced by Developing Countries. An interdisciplinary approach, therefore, will prepare Civil engineering professionals in developing countries for forthcoming shifts in technologies such as Computer aided design, digital data base management and information technologies. These disciplines have already found widespread applications in the construction of dams, Hi-rise buildings and intelligent transportation systems. .

TOPICS FOR PAPERS

The upcoming 6th INTERNATIONAL CIVIL ENGINEERING CONGRESS provides a platform to deliberate upon the above mentioned theme and would have scope to cover the following areas:

- **Assets Management**
- **Computers in Structures**
- **Coastal & Harbor Engineering**
- **Disaster Management**
- **Environmental Engineering**
- **High-rise Buildings**
- **Irrigation & Water Resources**
- **Roads, Highways & Bridges**
- **Safety & Health Management**
- **Sustainable Development**
- **Airport Engineering**
- **Construction Management**
- **Dams and Water Management**
- **Earthquake**
- **Geo Tech. Engineering**
- **Infrastructure Planning**
- **Quality Control & Quality Assurance**
- **Rural Development**
- **Structural Engineering**
- **Transportation**

Papers for presentation in the congress are invited from academia, civic organizations, industry NGO's and practicing engineers on any areas related to the broad theme of the Congress.

Papers accepted and presented in the Congress will be included in the proceedings of the Congress.

The Intention to present the paper along with ABSTRACT (250-300 words) including a short introduction of author (s) should reach the Organizing Committee for the 6th International Civil Engineering Congress as per schedule given below.
