About Seminar

Pakistan has great geopolitical importance in the region. The most vociferous depiction of this reality came in shape of China Pakistan Economic Corridor. The corridor is a \$48 billion project which will provide the shortest trade routes for the Chinese goods to the markets of Gulf and African regions via Gwadar port. The project is being seen as game changer of the region amid the challenges faced by it.

CPEC is seen a Game Changer in the region in following ways:

- It will bring economic unity in Asia particularly among the countries of South Asia, Middle East and adjacent states of Africa.
- It can bring stability in the region if countries are positively engaged in trade.
- CPEC can turn Gwadar port into an international trading point bringing fortune to Pakistan.
- China will seek control on the markets of region expanding its 'One Road, One Belt' Initiative.

Who should attend?

Engineers / Scientists / Technologists / Stake Holders/ Educationists, Faculty Members & All Discipline of Engineering Students.
