The Institution of Engineers Pakistan (IEP) is a professional body which works for promotion of Engineering Profession aiming at technological development and economic growth of the country. The institution holds regular Seminars/Conferences/Congresses/Workshop/Technical Lectures/Panel Discussion on mega issues and also related subjects. China Pakistan Economic Corridor (CPEC) is one such initiative which carries the prospects of transforming lives of the people of the region, opening new vistas of development and growth.

China Pakistan Economic Corridor (CPEC) is major initiative of Chinese and Pakistani Governments. This mega Project consist of major Energy, Infrastructure and Industrial Projects. It has the potential of changing the future of the People of Pakistan. It appears that the dream of every Pakistani to make Pakistan the Asian Tiger is coming true in not too distant a future.
